GRC Wave®

## Bring a Wave of Colour into Your Life

The simplicity and beauty of natural material is combined within glass and marble. This modern range of contemporary heaters is the latest in heating technology.

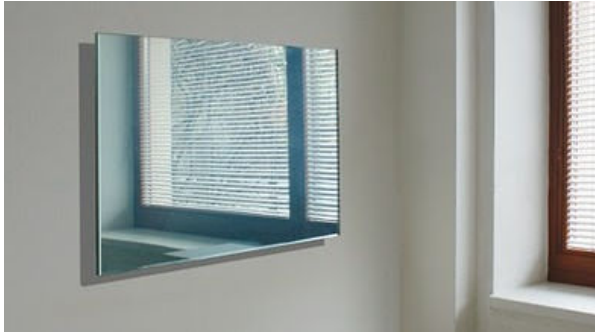

The philosophy is good design comes from form combined with excellent function. Frameless glass design available in different colours (black, pale grey, red, green and mirror)

These high-quality products are intended mainly for the heating of modern interiors and areas where great emphasis is laid on design purity and functionality. The heat radiated from these panels is very pleasant and natural.

An efficient and economic heating solution for rooms up to 25sqm. Easy to install on walls and ceilings. Ideal for lounges, bedrooms and bathrooms.

GRCWave leads the way in technological innovation and stylish design.

## Designs

Glass radiant panels are intended primarily for the heating of living spaces, GR panels are produced from 12 mm thick tempered glass, a heating element, a limiting thermostat and a supply cable.

You can specify floor mounts or mounting on a wall. The panels are produced in several colour versions and a mirror.

Wall-mounted GRT panels are intended mainly for bathrooms, where they fulfil not only the function of a dedicated radiant heater but also of a very stylish hand towel dryer.

The permanently fixed chrome towel rail is for hanging a hand towel or bath towel. The GRT is available in the same colours and mirror version as the GR.

The marble of massive 3cm polished marble board. The panel is intended for fixed installation on a wall.

As it is a natural material, deviations in the colour or in the structure make each radiator unique. It is possible to hang the panels width-wise or height-wise; mounting brackets are part of the packaging.

GRCWave is designed to be wall mounted or floor standing. The high quality chrome support feet hold the radiator securely in the horizontal position and give you the choice of putting the radiator anywhere you like. For a more permanent installation, the feet can be screwed to the floor to give you the peace of mind if the radiator is accidentally bumped into.

There are two ways of controlling the GRCWave. Every version is controlled by a standard on / off switch, but this can be enhanced by purchasing the optional wireless thermostat.

Being fully programmable the GRCWave is economical to use as it only uses a small amount of power to maintain a comfortable constant temperature. You can set the radiator to come on for the time you arrive home so you are welcomed to the warm, comforting radiant heat when you open the door.

Specify a wireless controllable radiator when you order. If you already have a GRCWave you can upgrade it easily and enjoy the benefits of having a set and forget heating system.

As with all our radiators and glass products the GRCWave is securely packaged and individually quality checked before we send it to you.

Installation is so easy anyone can do it. Full instructions are provided so you will have your new radiator ready to go in no time.

### Installation

GRCWave radiators are splash proof and have an excellent IP44 rating. The IP rating implies the radiators can be positioned next to the bath, shower or sink or anywhere you like.

The distance from the lower edge of the GRCWave to the floor should be more than 150mm and there should be at least 150mm clearance from any other room furniture fittings. Position your GRCWave in as open space as possible, radiant heat works best in this way.
